What Makes a CPO Vehicle Certified?

It meets our strict eligibility requirements.

Not just any vehicle qualifies to be Certified Pre-Owned. To be considered, dealers must ensure vehicles meet following requirements:

- Less than 6 years old
- Less than 75,000 miles
- Serviced according to schedule
- Includes a CARFAX® Vehicle History Report

It passes a 165+ point inspection.

Performed by our dealer's technicians, the vehicle inspection starts with the exterior, making sure the structure and appearance meet our standards. It continues inside with a full review of the finishes, seat belts, flooring and more.

Next, the inner workings of the vehicle are evaluated. Components like the electrical systems, engine, fluids, filters and transmission are thoroughly checked. Our dealers ensure that the tires are Mercedes-Benz approved, and all recall campaigns and standard services are performed before it's ready for the road.

It's road tested.

The best way to judge a vehicle is to get behind the wheel. Here, Mercedes-Benz Authorized Technicians evaluate the performance of the steering, brakes, suspension, drive shaft and overall ride quality. Even the noise and vibration levels are monitored to ensure the experience behind the wheel is smooth, quiet and exactly what you'd expect from a Mercedes-Benz.
